Hello Sirs/Ma'am,

I'm the Afloat CHRIMP Technician, supporting homeported ships in Rota, Spain on HAZMAT related matters. Attached SFR is being submitted on behalf of USS' PORTER (DDG-78) and DONALD COOK (DDG-75) stationed here. The European spec gas bottles in the SFR require SHML approval due to the U.S. spec bottles being used currently by the two ships are not permitted for transportation in European highways at anytime for whatever purposes. The 1st line item in the SFR (~~from USS ROSS~~) includes the reference AEL, but the rest (~~from DONALD COOK~~) do not because the information is still in the process of being obtained. Please advise approval. (The 2nd attachment is just a gas bottle list from DONALD COOK). Thanks.

Tony

1. Per ref (a), ref (b) received ref (c) through (g) SFR's from ref (h). Each SFR is reviewed and is assigned an SFR number by ref (b) and processed through the Hardware Systems Command (HSC) Technical Authorities (TA) ref (b) and (i). The following information provides the current status of your SFR's.

Ref (b) has forwarded your SFR's to ref (i) for further review and analysis. Upon ref (i) recommendation, NSWCCD TA will issue an authorization decision. Each SFR is reviewed and is assigned an SFR number by ref (b) and processed through the Hardware Systems Command (HSC) Technical Authorities (TA) ref (b) and (f). The following information provides the current status of your SFR's.

2. Concerning ref (c) SFR #5290 per ref (f):

Mike,

SFR #5290: The SFR requested material (NSN: 8010-00-598-5945; Enamel) was requested for an unspecified painting application. An authorized enamel of similar but not identical color (Color Chip 13538) and same unit-of-issue (1 GL), but with a lower VOC, is authorized for use by ships force for general painting applications. The NSN for this MIL-PRF-24635 enamel is 8010-01-396-6805. If this NSN is unsuitable, request that the ship provide documentation of the requirement for the specific application. In the meantime recommend that NSN: 8010-00-598-5945 remain prohibited on the Master and all Type SHMLs.

NAVSEA Warfare Center Code 635

DSN: 443-7494
frank.iaconianni@navy.mil

Therefore, NSN: 8010-00-598-5945 IS NOT APPROVED for use. Use NSN: 8010-01-396-6805 which has been updated in the Master SHML and all T-SHML's (minus the LCS and Submarine T-SHML's) with an AOB code of "A" (AUTHORIZED FOR SHIPBOARD USE).

3. Concerning ref (d) SFR #5291 per ref (f):

SFR #5291: The SFR requested material (NSN: 8030-00-933-7084) was requested to maintain watertight integrity in cableways. A search of authorized items for potential substitutes did not identify any products of similar properties or relatively low hazard. Therefore recommend that the AOB for NSN: 8030-00-933-7084 be changed to R on the Master and MC Type SHML, with the restriction "restricted to maintain watertight integrity in cableways."

Therefore, NSN: 8030-00-933-7084 IS APPROVED FOR USE and has been updated in the Master SHML and the MCM/MHC/MSC & PC T-SHML with an AOB code of "R" (RESTRICTED TO MAINTAIN WATERTIGHT INTEGRITY IN CALBEWAYS).

Subject: RE: V21247-5134-HZ62 / NIIN: 01-618-1533

Your Requisition, for V212475134HZ62 NIIN: 01-618-1533 has been D8 rejected by Navy ERP for the following reason: the NSN is considered hazardous and not currently authorized on the CVN Type specific - Ships Hazardous Material List (T-SHML). If you have a specific requirement for this product, please complete a SHML Feedback Report (SFR) to allow NAVSUP WSS to work this issue.

Upon completion of the SFR, E-Mail, or SALTS it to: wraps.prime.fct@navy.mil or FAX it to (717) 605-3480, DSN 430-3480. The automated SFR form, instructions and/or SFR Excel Spread Sheet may also be downloaded from the Standard Automated Logistics Tools Set (SALTS), by accessing SALTS and clicking on "SALTS Files" under the heading of "Request files from SALTS" and selecting "SHML FBR Form for Fleet use", "SHML FBR Instructions" or "SFR CHRIMP Submissions" for multiple SFR submissions."

Good morning,

Request assistance with ordering subject NIIN. We have tried to order twice using two different document series and both times have received "D8" status back. This is an urgent requirement for use on survival gear for all aircraft platforms.

USS THEODORE ROOSEVELT is currently deployed overseas and supporting aircraft operations. Your assistance is greatly appreciated.

V/r,

Chief,

Since the SHML already lists several authorized silicone damping fluids this request has been denied. The Technical authority NSWCCD has recommended use of NSN 9150-00-269-8246. If this is not a suitable substitute, we request that the ship provide specific material performance requirements so that another substitute can be identified.

THEREFORE THIS NSN WILL NOT BE AUTHORIZED OR ADDED TO THE SHML.

If you have any concerns , please contact me.

Thank you,

Have a great day!!

USS Russell (DDG-59);

Jen,

SFR # 5294: The SFR requested material (NSN: None; Damping Fluid; P/N 200CST15.500) was requested for use with Surface Vessel Torpedo Tube air flask pressure gauges. The SHML already lists several authorized silicone damping fluids, including NSN: 9150-00-269-8246. That product has a listed viscosity of 100 cSt, nominal at 77F. The requested item has a listed viscosity of 200 cSt, but temperature was not noted, nor was the viscosity rated as minimum, nominal or maximum. If NSN: 9150-00-269-8246 is suitable for the intended purpose, recommend that that be used in lieu of the time and expense required to assign a NSN to a new product. If the viscosity or other properties of the

recommended substitute are unsuitable, request that the ship provide specific material performance requirements, so that another authorized substitute could be identified, or if necessary, a NSN assigned to the requested item.;

Karen,

This should have been sent to your group for action. The DDG 59 is obviously not a submarine so product has no applicability to the SMCL.

I. JUSTIFICATION (To include equipment/application this material is to be used on):

Equipment: Surface Vessel Torpedo Tube (SVTT) air flask pressure gauges. System is charged at 1600 psig and instantly drops to 0 upon operation of Surface Vessel Torpedo Tubes. This rapid descent in air pressure requires oil in the gauges to prevent unnecessary wear to the gauge. Ship/DESRON 23/SWRMC checked waterfront for fluid and it is not available. Per ISEA, this commercially available fluid is a suitable alternative. This isn't a routine requirement, but at 80 dollars per gallon vs 2 brand new gauges pre-filled with the silicone it is a big money savings for the government. Plus filling the gauges doesn't require a new calibration where the new gauges require a new SYSCAL calibration which is also wasteful in man-hours and money. Damping fluid is not found on equipment MRC or PMS maintenance check.

USS Russell (DDG-59)

Jen,

SFR # 5294: The SFR requested material (NSN: None; Damping Fluid; P/N 200CST15.500) was requested for use with Surface Vessel Torpedo Tube air flask pressure gauges. The SHML already lists several authorized silicone damping fluids, including NSN: 9150-00-269-8246. That product has a listed viscosity of 100 cSt, nominal at 77F. The requested item has a listed viscosity of 200 cSt, but temperature was not noted, nor was the viscosity rated as minimum, nominal or maximum. If NSN: 9150-00-269-8246 is suitable for the intended purpose, recommend that that be used in lieu of the time and expense required to assign a NSN to a new product. If the viscosity or other properties of the recommended substitute are unsuitable, request that the ship provide specific material performance requirements, so that another authorized substitute could be identified, or if necessary, a NSN assigned to the requested item.

1. Per ref (a), ref (b) received ref (c) SFR from ref (d). Each SFR is reviewed and is assigned an SFR number by ref (b) and processed through the Hardware Systems Command (HSC) Technical Authorities (TA) ref (b) and (e). The following information provides the current status of your SFR.

2. Concerning ref (c) SFR #5297 per ref (e):

USS Freedom (LCS-1)

SFR # 5297: The SFR requested material (NSN: 9150-01-611-3977; Lubricating Oil, Gear; P/N: Mobil SHC 632) was requested for use IAW MIP 4531/L11, MRC FYE1. The MRC lists SPMIG [18749] which is associated with the requested item but not with its NSN. Furthermore the NSN is not listed on the SHML. The SHML lists several similar authorized gear oils, but none in the viscosity range of the requested item. Per the ISEA for the system, the requested viscosity range is required for the maintenance. Therefore recommend that NSN: 9150-01-611-3977 be added to the SHML, with an AOB of R on the Master and LC Type SHMLs with the remarks "Restricted IAW SPMIG [18749]" and MMI Code of Y.

Mike,

SFR #5299: The SFR requested material (Sealing Compound, P/N: 70005207090, NSN: none) was requested for use IAW MIP 7211/015, MRC FKZR. This material replaces the current MIL-PRF-81733 chromate-containing sealant with a less hazardous chromate-free sealant. It is also a candidate to replace chromate sealants on numerous other shipboard applications. Recommend that a NSN be assigned, and that upon NSN assignment it be listed on the Master and all Type SHMLs with an AOB Code of A and MMI Code of Y.

Therefore, Sealing Compound, P/N: 70005207090 IS APPROVED FOR USE and will be sent out for NSN assignment on separate correspondence. When the NSN is assigned, it will be added to the Master SHML and all Type SHML's (minus the LCS and Submarine T-SHML's) with an Allowed On board (AOB) code of "A" (AUTHORIZED FOR SHIPBOARD USE).

All Surface Hulls

Mike,

SFR #5300: The SFR requested material (Sealing Compound, P/N: 70005204329, NSN: none) was requested for use IAW MIP 7212/1B2, MRC NU92. This material replaces the current MIL-PRF-81733 chromate-containing sealant with a less hazardous chromate-free sealant. It is also a candidate to replace chromate sealants on numerous other shipboard applications. Recommend that a NSN be assigned, and that upon NSN assignment it be listed on the Master and all Type SHMLs with an AOB Code of A and MMI Code of Y.

Therefore, Sealing Compound, P/N: 70005204329 IS APPROVED FOR USE and will be sent out for NSN assignment on separate correspondence. When the NSN is assigned, it will be added to the Master SHML and all Type SHML's (minus the LCS and Submarine T-SHML's) with an Allowed On board (AOB) code of "A" (AUTHORIZED FOR SHIPBOARD USE).

Hi Mike,

I sent this SFR a couple of minute ago, but had to correct the final product color. It is dark brown (and not gray, as listed in the first email).

Attached is an SFR for a non-chromate sealing compound conforming to MIL-PRF-81733. This is a non-chromate substitutes for chromate-containing sealants that we are trying to replace. Note that the product is a 2-part kit, with both parts listed on a single MSDS. The scan of the labels (for the base and catalyst containers, and the case), technical data sheet, and MSDS are also attached. Additional information is listed below. Let me know if you need any other information.

I. JUSTIFICATION (To include equipment/application this material is to be used on):

ST-100 Terrazzo flooring is a long lasting deck covering that withstands adverse weather conditions in spaces adjacent to weather decks. It is composed of an aggregate compound that is light weight and easy for ships force to install. It performs better than tile in areas subject to precipitation and is durable enough to work in machine shops and tool rooms in which heavy items are moved or used preventing scratching tile or PRC decks.
